EDUCATION

University Department, Rajasthan Technical University, Kota
B.Tech in Information Technology

Sep 2022 Jun 2026
Kota, Rajasthan

TECHNICAL SKILLS

Programming Languages: JavaScript, Python
Frontend Development: React.js, HTML, CSS, Tailwind CSS, GSAP, Motion (Framer Motion)
Backend Development: Node.js, Express.js, Django
Databases: MongoDB, MySQL, PostgreSQL
ORM/Tools: Prisma
Authentication & Backend Services: Firebase, Clerk
API & Integrations: REST APIs, Google APIs, Gemini API
Developer Tools: GitHub, Postman, VS Code
Core Concepts: Object-Oriented Programming (OOP), Data Structures, Computer Networks

EXPERIENCE

Full Stack Developer

06/2024 – 08/2024

NexicornAI

Gurugram, Haryana, India

- Developed core features for a job portal including user authentication, resume uploads, and job tracking using MERN stack
- Implemented role-based dashboards and job filtering system for 200+ users
- Improved backend response time by approximately 40% through query optimization

Technical Engineer

07/2023 – 09/2023

BKT Tires

Bhuj, Gujarat, India

- Worked on equipment maintenance and process optimization in industrial environment
- Collaborated with cross-functional teams to improve operational efficiency

PROJECTS

AI-Powered Interview Assistant (Full Stack SaaS)

- Built a full-stack SaaS platform using React.js, Node.js, Express.js, and MongoDB for AI-driven interview preparation
- Integrated OpenAI API to generate personalized technical and HR interview questions based on user resumes
- Implemented performance analytics system to evaluate responses and provide intelligent feedback
- Developed credit-based billing system using Razorpay API for premium access management
- Built secure authentication using Firebase Google Auth with role-based access control
- Deployed production-ready application on Render with optimized configurations

Full-Stack Uber Clone (MERN)

- Developed a ride-booking application using React.js, Node.js, Express.js, and MongoDB
- Implemented JWT-based authentication for users and captains with secure login and session management
- Integrated Google Maps API for real-time location tracking, distance calculation, and address suggestions
- Engineered real-time ride workflows including trip requests, fare estimation, and ride status updates

- Managed global state using React Context API for seamless user experience across application

AI-Powered Code Reviewer (MERN + Gemini AI)

- Built a full-stack application using Google Gemini AI to analyze and suggest improvements for code snippets
- Developed REST APIs with Node.js and Express.js integrating Google Generative AI SDK
- Designed interactive frontend using React with syntax highlighting and markdown rendering
- Implemented secure client-server communication using Axios and CORS configuration

PhonePe Backend System (FinTech Application)

- Developed scalable backend system using Node.js, Express.js, and MongoDB for digital payments
- Implemented secure authentication using JWT and BcryptJS for password and MPIN protection
- Built core features including peer-to-peer transfers, wallet top-up, and bill payment system
- Designed efficient database schema using Mongoose for transaction management
- Created RESTful APIs with Swagger documentation and tested endpoints using Postman

ACHIEVEMENTS

- Secured a job offer from Adani Green Energy Ltd. in October 2023, recognizing strong technical and industry readiness
- District-level Cricket Player, Wicketkeeper-Batsman
